PROFESSIONAL SUMMARY

Civil Engineering MS candidate at the University of Alabama at Birmingham with hands-on field and project engineering experience across three internships including a $45M+ commercial building project, state highway construction, and foundation works. Core strengths include field operations, building layout, line & grade control, QA/QC inspections, site safety (OSHA 30-Hour certified), subcontractor coordination, cost control, quantity take-offs, pay application verification, RFI and submittal management, and construction scheduling support. Proficient in AutoCAD, Revit, Navisworks, BIM 360, Primavera P6, and Bluebeam with active FE Exam enrolment in 2026. Brings a rare combination of real job-site accountability, BIM-integrated digital workflows, and academic construction management training — ready to contribute immediately as a Field Engineer, Project Engineer, or Civil Engineer on commercial, infrastructure, or heavy civil projects across the USA.

EDUCATION

University of Alabama at Birmingham **Jan 2024 – Dec 2025**
Master of Science, Civil Engineering Birmingham, Alabama
GPA: 3.6 / 4.0
Coursework: Construction Engineering Management, Construction Safety, Project Management, Estimation & Bidding, BIM

Mother Teresa Institute of Science and Technology **Jun 2020 – Jul 2023**
Bachelor of Technology, Civil Engineering Sathupally, India
GPA: 8.0 / 10
Coursework: Structural Analysis, Reinforced Concrete Design, Steel Structures, Geotechnical Engineering, Foundation Engineering, Construction Planning & Management, Transportation Engineering, Surveying, Environmental Engineering

EXPERIENCE

BECC, Inc. Mar 2026 – Present
Senior Engineering Technician & Construction Inspector **Birmingham, Alabama**

- Conduct field and site inspections using ACI 318 and AISC 360 criteria, verify foundations and structural steel, and confirm safety compliance — resulting in zero code violations across all inspected projects.
- Review engineering drawings and bar-bending schedules for constructability using the AISC Steel Construction Manual; identified and corrected design issues before construction, reducing rework incidents.
- Perform QA/QC checks on concrete mixes, reinforcement placement, and workmanship using standard checklists, ensuring materials and methods meet project specifications.
- Manage RFI documentation and coordinate daily with engineers, project managers, and contractors to resolve technical issues and keep the project schedule on track.
- Assist in concrete compressive-strength testing and steel reinforcement inspections; collect and analyse data per ACI 318, enabling timely design adjustments and preventing schedule delays.
- Maintain accurate inspection logs, compliance documentation, and closeout records in the company's QA system for quick audit retrieval; provide technical guidance on bar-bending schedules and safety protocols to junior technicians.

Level Builders Pvt Ltd — G+8 Commercial Building (Shear Wall Technology) Jan 2023 – Jul 2023
Site Engineer Intern **Hyderabad, India**

- Supported field operations on a $45M+ commercial building under the Project Superintendent, using AutoCAD and on-site surveying tools to coordinate shear-wall installation in compliance with IBC standards.
- Managed cost control and budget monitoring for structural concrete and shear-wall activities by tracking expenditures in Excel and reviewing vendor quotes, helping keep the project within its allocated budget.
- Prepared quantity take-offs and validated pay applications by crosschecking installed quantities against contract documents using digital quantity-extraction software, resulting in accurate billing and timely payments.
- Assisted in reviewing and tracking subcontractor invoices, commitments, change orders, and project cost reports using Excel and project-management software.
- Coordinated material procurement and delivery schedules with subcontractors and suppliers using procurement logs, ensuring on-time delivery and uninterrupted field execution.
- Prepared Daily Construction Reports (DCRs) and uploaded electronic field documentation — including submittal logs and field photos — to the project's SharePoint site.

Godha Infrastructures Pvt. Ltd. **Nov 2019 – May 2020**
Field Engineer Intern **Hyderabad, India**

- Assisted field engineers with daily site operations including daily log preparation, material delivery coordination, and schedule updates for foundation, post-tensioning, and slab work.
- Reviewed structural drawings, applied RS Means unit pricing, and coordinated with subcontractors to ensure design intent was met; participated in quality audits and communicated corrective actions.
- Assisted in shop drawing review, RFI tracking, and technical documentation; used Primavera P6 to update schedule data and prepared clear project reports for timely decision-making.
- Conducted material testing and inspections per ASTM specifications; recorded results in QA/QC logs and reported non-conformances to maintain project compliance.

PROJECTS

Bridge Engineering Research – Bridge Failure Analysis

- Analysed bridge failure case studies to identify structural, geotechnical, and design flaws; proposed modern engineering solutions to prevent future failures.

BIM Case Study – BIM-Based Safety Planning in Construction

- Developed a BIM-based safety model using Revit and Unity to simulate accidents; designed a computer vision–integrated framework for real-time construction site safety monitoring.

Non-Thesis Research – Energy Performance Analysis Using Revit Insight and Green Building Studio

- Built a BIM model in Autodesk Revit and ran energy simulations (EUI: 206 kWh/m²/year); analysed thermal and daylight factors and recommended envelope improvements to reduce cooling loads.

Construction Estimation & Bidding – Residential Garage Project

- Prepared detailed Bill of Quantities and cost estimates for structural, architectural, and utility works using RS Means unit rate analysis; performed quantity take-offs with On-Screen Take-off (OST).

TECHNICAL SKILLS

- **Construction & Engineering:** Site execution & supervision, subcontractor coordination, QA/QC, construction safety, cost control, quantity verification, RFI management, submittal log tracking, change order management, DPR documentation, CPM scheduling basics, constructability review, close-out documentation
- **Estimation & Cost:** Quantity take-off (manual & software), BOQ preparation, RS Means unit pricing, bid analysis, contractor billing verification, cost forecasting, project controls
- **Structural & Civil:** RCC structures, foundations, pipelines, structural drawings review, bar bending schedules (BBS), load path understanding
- **BIM / Digital Construction:** Revit modeling, Navisworks clash detection, BIM coordination, 4D scheduling concepts, digital quantity extraction, model-based constructability analysis, as-built drawings
- **Software:** AutoCAD, Revit, Navisworks, On-Screen Take-off, Microsoft Excel, Microsoft Word, MS Project, Primavera P6 (basic), Bluebeam
- **Codes & Standards:** AISC 360, AISC Steel Construction Manual (LRFD & ASD), ACI 318, ASCE 7, IBC, IS 456 & IS 800
- **Soft Skills:** Analytical & critical thinking, high attention to detail, technical documentation & reporting, clear written & verbal communication, team collaboration, problem solving, time management, adaptability

CERTIFICATIONS

- OSHA 30-Hour Construction Safety
- American Red Cross: Adult and Paediatric First Aid / CPR / AED
- AutoCAD (Autodesk Certified)
- Revit (Autodesk Certified)
- STAAD Pro
- 3Ds Max
- Sketch Up
- Civil 3D

IN PROGRESS

- FE (Fundamentals of Engineering) Exam — Enrolled 2026
